

The INR Lot Size Cheat Sheet

Position sizing, pip values and market hours — in rupees, on one sheet. Educational reference, not advice.

Reference rates used below: USD/INR 95.50 · USD/JPY 159.00 (verified 27 August 2026). Rates move — recompute live at howtoinvest.pro/forex.

1 Lot sizes

LOT	UNITS (FX PAIRS)	GOLD (XAUUSD)	1 PIP ON EUR/USD	≈ IN RUPEES
Standard (1.00)	100,000	100 oz	\$10.00	₹955
Mini (0.10)	10,000	10 oz	\$1.00	₹95.50
Micro (0.01)	1,000	1 oz	\$0.10	₹9.55

Micro lots are the granularity of risk control — the smallest step most platforms allow.

2 What one pip is worth in ₹ (per lot size)

PAIR	PIP SIZE	STANDARD	MINI	MICRO
EUR/USD · GBP/USD	0.0001	₹955	₹95.50	₹9.55
USD/JPY	0.01	₹600.63	₹60.06	₹6.01
Gold (XAUUSD)*	\$0.10	₹955	₹95.50	₹9.55
USD/INR (offshore)	0.0025	₹250	₹25	₹2.50

*Using the common \$0.10-per-pip convention on a 100 oz contract; some platforms count each \$0.01 tick as a \$1 pip — check your contract specs. USD/JPY converted at the reference rates above.

3 Position size from your risk

$$\text{Lots} = (\text{Balance} \times \text{Risk\%}) \div (\text{Stop in pips} \times \text{Pip value in ₹ per lot})$$

Worked example: ₹1,00,000 account · 1% risk (₹1,000) · 20-pip stop on EUR/USD.
Pip per lot ≈ ₹955 → $1,000 \div (20 \times 955) = 0.052$ → **round DOWN to 0.05 lots** (5 micro lots) · actual risk **₹955**.
Always round down — rounding up silently risks more than you chose. The 1–2% risk figure is a widely cited convention in trading literature, not a rule.

4 Forex market hours in IST

India has no daylight saving — IST is fixed at UTC+5:30, so it is the foreign sessions that shift twice a year.

WINTER (NOV–MAR)			SUMMER (APR–OCT)		
SESSION	OPENS IST	CLOSES IST	SESSION	OPENS IST	CLOSES IST
Sydney	01:30	10:30	Sydney	02:30	11:30
Tokyo	05:30	14:30	Tokyo	05:30	14:30
London	13:30	22:30	London	12:30	21:30
New York	18:30	03:30 +1	New York	17:30	02:30 +1
London–NY overlap	18:30	22:30	London–NY overlap	17:30	21:30

For ~3 weeks each March and late October/November the US and UK change clocks on different dates and the overlap temporarily runs about 17:30–22:30 IST. The [live clock at howtoinvest.pro/forex](#) computes today's exact windows. Market closed on weekends.

5 Five numbers worth memorising

1 pip, EUR/USD, micro lot	≈ ₹9.55
Balance where 1% risk covers one micro lot (20-pip stop, EUR/USD)	≈ ₹19,100
Gold standard lot notional at \$4,650/oz	≈ \$465,000
Margin for 0.05 lots EUR/USD at 1:500 (price 1.165)	≈ ₹1,113
Busiest hours (winter, IST)	18:30–22:30
